

Conclusions for SPR 2020

Stephen J Eglen

Julia

- ▶ [Julia Express](#)
- ▶ [Introduction to Computational thinking](#) (Alan Edelman, David Sanders, Grant Sanderson et al.)
- ▶ [Quantecon cheatsheet](#) (Julia, Matlab, Python)

Git and github

Spectrum of solutions:

RCS: version control from the 1980s...

Git: Version control for those with an IQ of over 200.

<https://gitconnected.com/learn/git/learn-git-in-15-mins-from-github-55b48b>

<https://lgatto.github.io/github-intro/>

<https://github.com>

Notebooks and mybinder

Rstudio can be run in the cloud.

e.g. [https:](https://mybinder.org/v2/gh/sje30/neuRo/master?urlpath=rstudio)

[//mybinder.org/v2/gh/sje30/neuRo/master?urlpath=rstudio](https://mybinder.org/v2/gh/sje30/neuRo/master?urlpath=rstudio)

See: <https://github.com/sje30/neuRo>

but it also runs notebooks,, more popularly.

Other solutions exist including [colab](#) and
[\[pluto.jl\]\(https://github.com/fonsp/Pluto.jl\)](#)

Writing your own packages

Wrap up your code and data into an R package so that it can be easily shared with others.

e.g. <https://rstudio.com/resources/rstudioconf-2018/you-can-make-a-package-in-20-minutes-jim-hester/>

https://evamaerey.github.io/package__in__20__minutes/package__in__20__minutes

Tidyverse

Hadley Wickham's important contributions to R...

The “tidyverse” approach

ggplot2 <https://devtools.r-lib.org/>>

devtools <https://devtools.r-lib.org/>

Advanced R <https://adv-r.hadley.nz/>

R for data science: <https://r4ds.had.co.nz/index.html>

Now practice

Figure 1: awesome
